Artificial insemination instrument magazine . includes positioned
over working shaft to which canal granulated sperm container is
joined

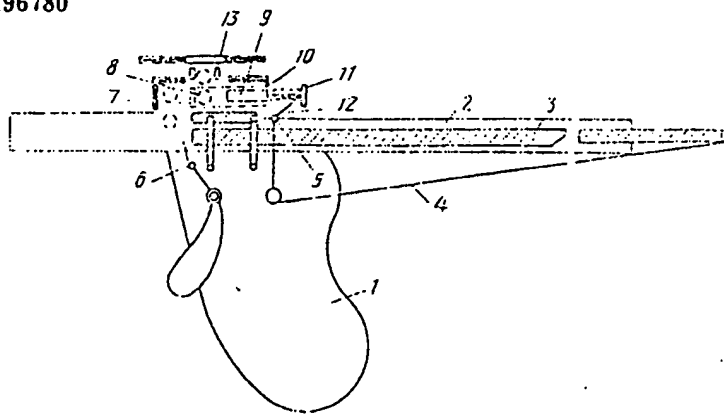

UKR CATTLE REARING 24.04.85-SU-911447

(07.02.87) A61d-07/02

24.04.85 as 911447 (1462AS)

The artificial insemination device has a working shaft attached to a handle, a mandren introduced into the canal of the shaft and a magazine in the form of a container for granulated sperm, positioned in a Dewar vessel with cryogenic medium. The magazine (13) is positioned over the working shaft (2) to the canal of which the cavity of the container for granulated sperm is joined by a sluice chamber (7) which has a gas evacuation canal (10) and an undersprung pusher gate (11).

ADVANTAGE . This artificial insemination device is more effective and reliable in operation. Bul.5/7.2.87 (3pp Dwg.No.1/2)
